DETAILED ACTION

1. This Office Action is made in response to applicant's after final amendment filed on 6/28/2006. Claims 1 and 2 are currently pending in the application. An action follows below:

Allowable Subject Matter

2. Claims 1 and 2 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a material presentation and teleconferencing device with an input device. Each independent claim identifies the uniquely distinct features an optical filter removably provided to the photographic section to enable the photographing section to photograph only light emitted from the pointing mark and when the filter is not in place material mounted on the material mounting pedestal is able to be photographed, further discussion of this feature is found in the applicant's remarks filed on 6/28/2006 in the paragraph spanning pages 8 and 9. The closest prior art, Tang (USPN: 5239373) discloses a teleconferencing device with input means, but lacks a filter that is removable so that the photographing section is able to change between filtered and non-filtered image capture, fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
